- NOTES :
- The reinforcement of slab at transverse beam part should be followed the drawing of transverse beam reinforcement.
  - The main reinforcement of pole supporting beam is defined in the other drawing of detail of pole supporting beam.
  - If reinforcement bars placed around the pole supporting beam (w3-1. w3-2) and reinforcement bars placed around expansion joint of retainer part (w4) are placed at the same position, secure the required clearance (4/3 or more of the maximum dimension of coarse aggregate) for each reinforcement bar.

- GENERAL NOTES
1. ALL DIMENSIONS ARE IN MILLIMETERS UNLESS MENTIONED OTHERWISE.
  2. DO NOT SCALE THE DIMENSIONS. ONLY WRITTEN DIMENSIONS SHALL BE FOLLOWED.
  3. THIS DRAWING SHALL BE READ IN CONJUNCTION WITH THE DRAWINGS OF FOLLOWING ITEMS
